1

2

3

4

. Modern design and square shape, Quad seal pouches are K-seal stand-up pouches' perfect whole companions. They' re also the best match of any retail boxes in terms of cost efficiency.

. Dimensions can be fully customized according to your request

MATERIAL

01

Plastic: film textured,
can be achieved matte
or glossy finish

02

Kraft paper: with rough
and smooth two finish,
nature than plastic

03

Aluminum foil
with metallic luster
enhanced barriers

04

Rice paper comes
from renewable sources
such as bamboo or tree
bark.

INNOVATION

100% Compostable/Biodegradable

Natural Kraft paper with a wood pulp-based barrier layer and an interior plant-based "PLA" layer.

◦ **What does that mean?**

- The outer and barrier layers are the same as 60% compostable.
- Polylactic acid (PLA) is a novel biodegradable material made from starch raw materials proposed by renewable plant resources such as corn, it uses a sustainable source instead of fossil fuels like typical plastics.

INNOVATION

100% Recyclable

Regarding the recyclable bags we provide, the whole bag is made of LDPE, including zipper and valve. LDPE (Low-density polyethylene) is a safe material that can be easily reused and recycled (#4), more popular in Europe.

◦ **What finish available?**

- Matte lamination
- Glossy lamination
- Spot matte and glossy lamination
- Rough matte lamination
- Clear window lamination
- Frosted transparent lamination
